SKILLS

Frontend	: JavaScript, TypeScript, React.js, Next.js, Redux Toolkit, HTML, CSS, SCSS, Tailwind CSS, Bootstrap, Material-UI, jQuery, AJAX, Storybook
Backend	: Node.js, Express.js, Socket.IO, Mongoose, REST API Design, JWT Authentication, Jest (Testing)
Devops	: AWS (EC2, S3, Amplify, Route53, IAM, Elastic Beanstalk), PM2, Nginx, CI/CD Basics
Database	: MongoDB, PostgreSQL, Redis, Pinecone Vector DB
Tools	: Git, GitHub, VS Code, Postman, Figma, Swagger, JMeter, Storybook, RabbitMQ, Webhooks
AI/ML	: OpenAI APIs, Pinecone, Algolia Search
Core Competencies:	Data Structures & Algorithms, MVC Architecture, Performance Optimization, Caching, SEO-friendly,

EXPERIENCE

Appiness Interactive , Bangalore • FULL STACK DEVELOPER	<i>06/2024 - present</i>
- Built SEO-optimized marketing websites using Next.js, improving organic traffic and page performance - Developed intelligent search recommendations using OpenAI, Pinecone vector DB, and Algolia, improving search accuracy and UX - Engineered geofence module for FleetOS, enabling real-time fleet boundary tracking & alerts - Handled vehicle real-time data ingestion using webhooks, RabbitMQ, and PostgreSQL, improving live asset monitoring - Implemented data processing and analytics pipelines for fleet asset management improving insights & efficiency - Led Storybook setup and onboarding for Manipal Hospital revamp project, educating teams on component-driven development - Built custom AI search bot with Pinecone + OpenAI on hospital data for fast contextual query responses - Developed complete onboarding module for an e-commerce seller system with PAN verification, OTP auth, location access, and multi-auth flows - Built reusable dynamic table component supporting pagination, dynamic filters, custom cell renderers, and column sorting, now used across projects - Integrated Razorpay payment flows for e-commerce platform - Improved API performance using caching (Redis) and code-level optimizations, reducing response time significantly - Developed coupon module and seller management features in admin panel to streamline marketplace operations	
Plutocrat Simulations Tech Pvt. Ltd, Hyderabad • FULL STACK DEVELOPER	<i>11/2022 - 02/2024</i>
- Utilized advanced Figma methodologies to streamline the design process, achieving a 30% reduction in UI development time. This approach ensures seamless collaboration between designers and developers. - Consolidated efforts with frontend and backend teams to develop and deploy RESTful APIs, streamlining component communication and improving overall system efficiency; reduced API response time by 50% and enhanced user experience. - Successfully deployed and managed applications on AWS EC2 instances, utilizing Nginx as a proficient reverse proxy for better performance. - Developed a highly interactive chat application using Socket.IO, seamlessly integrating social media functionalities; boosted user interaction and engagement by 40%, resulting in a 25% increase in monthly active users. - Collaborated with project managers, developers, and QA analysts to analyze and optimize testing processes, resulting in a 50% reduction in bug discovery time and an 80% increase in overall product quality. - This initiative led to a 30% reduction in bug count, enhancing overall product quality and customer satisfaction.	

- Developed an immersive training program for the MERN stack, equipping team members with advanced full-stack application development skills. **Increased team productivity by 40% and reduced development time by 25% through optimized user experiences and enhanced functionality.**
- Acquired proficiency in React, Node.js, and MongoDB via intensive MERN stack training; executed comprehensive full-stack development projects, resulting in streamlined processes, increased efficiency, and enhanced user experiences, contributing to a 25% reduction in bounce rate and a **30% improvement in page load times.**

PROJECTS

Shoppi [E-Commerce Website]

[source-code](#)

- User authentication system, covering signup, login, and logout functionalities.
- Product browsing, searching, and filtering features for enhanced user experience.
- Shopping cart and wishlist functionality to facilitate seamless shopping interactions.
- Secured checkout processes with **Razorpay integration.**
- User profiles for efficient order management and updates.
- Vendor accounts with comprehensive product management capabilities.
- Sales reporting tools to empower vendors with valuable insights.
- Admin panel for streamlined login/logout, data management, and user/vendor administration.

Technologies used: **Node.js, MongoDB, Express, Bootstrap, Razorpay, Twilio, SweetAlert, Handlebars**

Chit-Chat[Chat Application]

[source-code](#)

- Implemented a robust user authentication system using industry-leading encryption protocols, ensuring secure login functionality and protecting user data from unauthorized access.
- Enabled instant notifications for users upon receiving new messages.
- Utilized Socket.IO for efficient and responsive real-time communication.
- Ensured a seamless user experience through a user-friendly interface and robust notification system.

Technologies used: **Node.js, MongoDB, Express, React.js, Chakra UI, SocketIO, Mongoose, JWT**

Telegram Weather Bot

[source-code](#)

- Engineered a user-friendly Telegram bot with Node.js and MongoDB, facilitating seamless user registration for weather updates and admin panel creation for API key management and user control.

Incubation Management

[source-code](#)

- Implemented a cutting-edge system to simplify startup registration and slot booking, utilizing ReactJS and Node.js; optimized user experience, resulting in a **50% increase** in completed registrations and saving an estimated 20 hours per week.

EDUCATION

Bachelor of Travel and Tourism Management • Calicut University

2016-2019

Higher Secondary -Science • PMSAMAHSS Chemmankadavu

2014-2016
